EELS

**ENERGY
EFFICIENT
LIFESTYLE
SOLUTIONS**

Helping the citizens of Juneau in
crisis and beyond.

A JOINT EFFORT OF
SAGA AND
THE UNITED WAY-SE

What We Do

The EELS seek to aid the Juneau community in saving on their increasing electric bills by helping households to become more energy efficient. We see this energy crisis as an opportunity to introduce energy efficiency as a way of life in Juneau and to encourage use of these practices even beyond this crisis.

How It Works

At your request, a team of at least 2 individuals, who have completed a thorough background check, will come to your home. At this session, the team will look around your house for ways you can cut energy use. The team may install Compact Fluorescent light bulbs, weather stripping, or instruct you on how to turn down your water heater. They may also have suggestions on things you can do

yourself to cut your costs. Some of these things may be a quick change such as the use of power strips, while others may be something as large as investing in a new refrigerator. These are all only suggestions and you can take them or leave them.

*Appointments will be prioritized by income level and need.
